

**CHANNEL ISLANDS HARBOR WATER QUALITY:  
REMOTE SENSOR DATA – 08/26/21 THROUGH 08/31/21**

Below is the weekly remote sensor data from 8/26/21 to 8/31/21. Dissolved oxygen concentrations (DO; in blue) trended downward over the week (see graph with rolling averages) but concentrations remained acceptable at both stations. Chlorophyll concentrations (a proxy for microscopic algal biomass, in green) were generally low with normal daily oscillations observed.

The City of Oxnard and Aquatic Bioassay & Consulting will continue to monitor the sensors in the area.
