

Below is the weekly remote sensor data from 6/14/23 to 6/20/23. Dissolved oxygen (DO; in blue) and chlorophyll concentrations (a proxy for microscopic algal biomass, in green) were acceptable at both stations with normal daily oscillations observed. Spikes of chlorophyll concentrations ($> 20 \mu\text{g/L}$) observed at station 6 is likely artifactual.

The City of Oxnard and Aquatic Bioassay & Consulting will continue to monitor the sensors in the area.

Logger 062554 – Located at Seabridge (Station 6)

Logger 062556 – Located at Westport (Station 7)
