

CHANNEL ISLANDS HARBOR WATER QUALITY: REMOTE SENSOR DATA – 03/26/20 THROUGH 04/08/20

The remote sensor data from 3/26/20 to 4/3/20 is data collected since the date of installation (3/26/2020). This data captures long-term trends of dissolved oxygen concentrations (DO; in blue) and chlorophyll fluorescence (a proxy for microscopic algal biomass; in green) at two designated sampling locations. The City of Oxnard and Aquatic Bioassay & Consulting will continue to monitor the sensors in the area.
